

12 February 2019

Dear Parents/Carers,

**Our imaginative learning project for next half term is:** Potions

**The memorable experience that will start our project will be:** An exciting science experiment trying to fathom the mysteries of an unidentified flying potion.

**Objective of this activity:** To make scientific predictions, make detailed observations, to begin to understand a little about different states of matter and to have fun with the 'wow' side of Science.

**Dress code:** There will be no dress up sessions for this project.

**Other things to note:**

During the first week back, each class will have a day off of timetable working on an electrical circuits DT project.

World Book Dress Up Day will fall during this project (on Thursday 5<sup>th</sup> March).

Yours sincerely

Mrs Mackie-Gandy and Miss Greig
